Wayne County announces 2015 County Roads Seasonal Weight Restrictions

DETROIT – Wayne County's Department of Public Services will be enacting seasonal roads weight restrictions starting at 7:00 am on Friday, March 13, 2015 due to current frost conditions affecting Wayne County roads. In order to minimize the impact that heavy trucks have on roads during the freezing and thawing cycle of the early spring, road agencies under Michigan law are allowed to enact weight restrictions on roads that are not designated as all-season routes.

Seasonal restrictions lower the axle-loading limits and reduce the maximum travel speed for certain vehicles. Please note that the weight restrictions only apply to specific Wayne County roads which are under Wayne County's jurisdiction. For information concerning roads under the jurisdiction of individual cities within Wayne County, please contact the specific city. For a detailed list identifying specific Wayne County Roads subject to seasonal weight restrictions, visit the DPS homepage at http://www.waynecounty.com/dps/index.htm. A notice will be posted on the Wayne County Department of Public Services webpage once the seasonal weight restrictions are lifted.

For more information, please contact the Wayne County Weighmaster's office at 734-955-2363.
